OF OUR EXTENSIVE
EXPERIENCE

PRODUCTS FOR ELECTRONICAL AND PHARMACEUTICAL INDUSTRY

PACKAGING

HYGIENE-PRODUCTS

With almost 50 years experience, gained across a variety of product sectors in countries throughout the world, Schober can offer the tools and machinery to make your after-print operations a success.

It has long been standard policy for us to involve ourselves closely with our customers' after-print problems and requirements. So whether it is business forms, labels, packaging or hygiene-products, you can expect us to observe and analyse your operation — and, if necessary, develop products for your individual needs.

Punching, cutting, perforating, ultrasonic welding and sealing, collating, self-adhesive label dispensing and gluing, whatever your need, you can benefit from our comprehensive specialist knowledge.

STAY AHEAD, WITH THE LATEST TECHNOLOGY

tear-off perforations

With fully qualified technicians as part of our comprehensive after-sales service, you'll never lack for spare parts or technical assistance. Our aim is simple: the best quality products, offering the best price/lifetime ratio, with the best delivery times anywhere. Contact Schober today — and you'll find our aim is a reality.

**SPECIALIST ENGINEERING
SERVICES FOR ALL YOUR
AFTER-PRINT**

PROBLEM SOLUTIONS, WHICH INCREASE YOUR PRODUCTIVITY

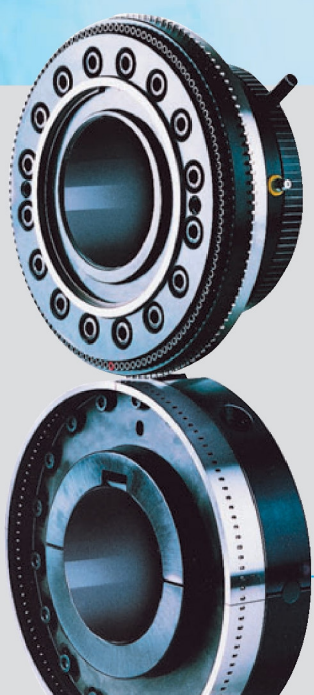

Ultrasonic welding system
for the joining of multi-layer material

Built-in modules for
die cutting sanitary napkins
using a T.C. (tungsten carbide) die.
Fine adjustment of the die
compensates for wear, and the
precision bearing ensures low
temperature during operation.

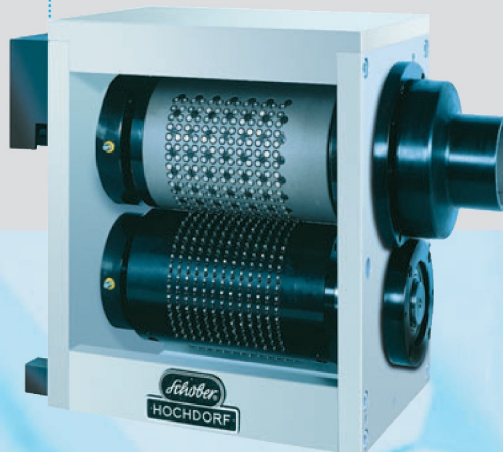

Rotary cutting dies
for the packaging industry, with
interchangeable die cutting segments

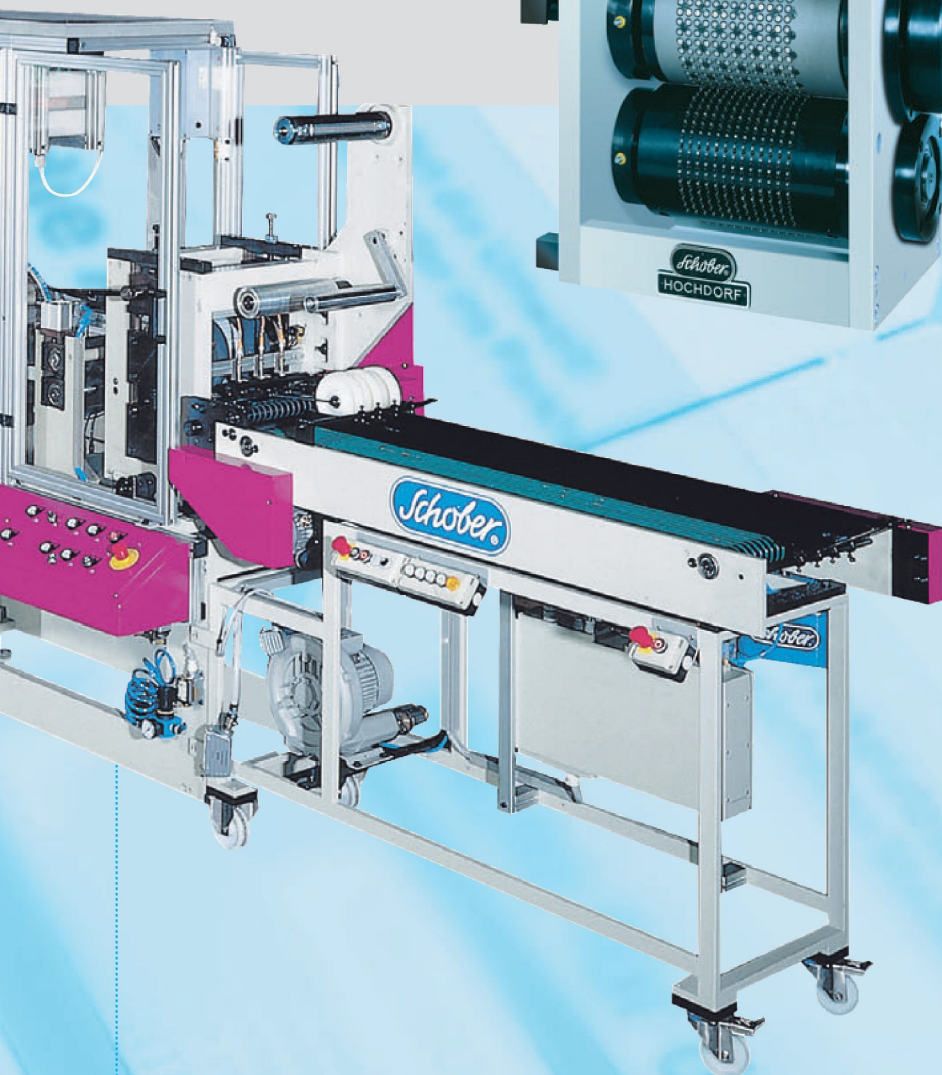

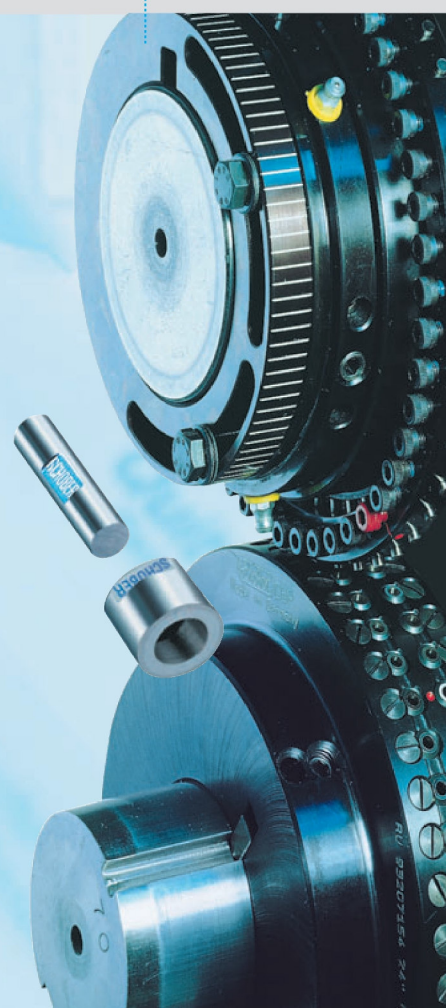

Rotary punching tools
for oblong and specially shaped holes

Rotary punching modules
for the production of labels, tickets,
parking and airline tickets,
tea tags and plaster
made out of different materials

The only rotary line
hole punching tool
with patented safety groove

MTP machine
for the production of ATB and parking
tickets with folding- and single card delivery

**FINISHING
FOR PRINT:
THE TECHNOLOGY
TO MEET
YOUR NEEDS.**

From single cutting knives through
built-in modules to complete
machines for on- or off-line use,
Schober offer a comprehensive
range of standard products.
Schober technology means the
finishing equipment you need to
make the most of all types of printing
and converting machines.

Units and modules can be ordered
with new machinery, or retrofitted to
existing plant. Schober experts will
produce the right solution for any

particular application — in punching,
cutting, perforating and more. And
you have the security of Schober's
unbeatable skills and experience in
finishing technology.

In today's graphic industry, you need
built-in modules and special equipment
designed to meet the high standards
of finish your customers expect.
That is just what Schober finishing
technology is all about.

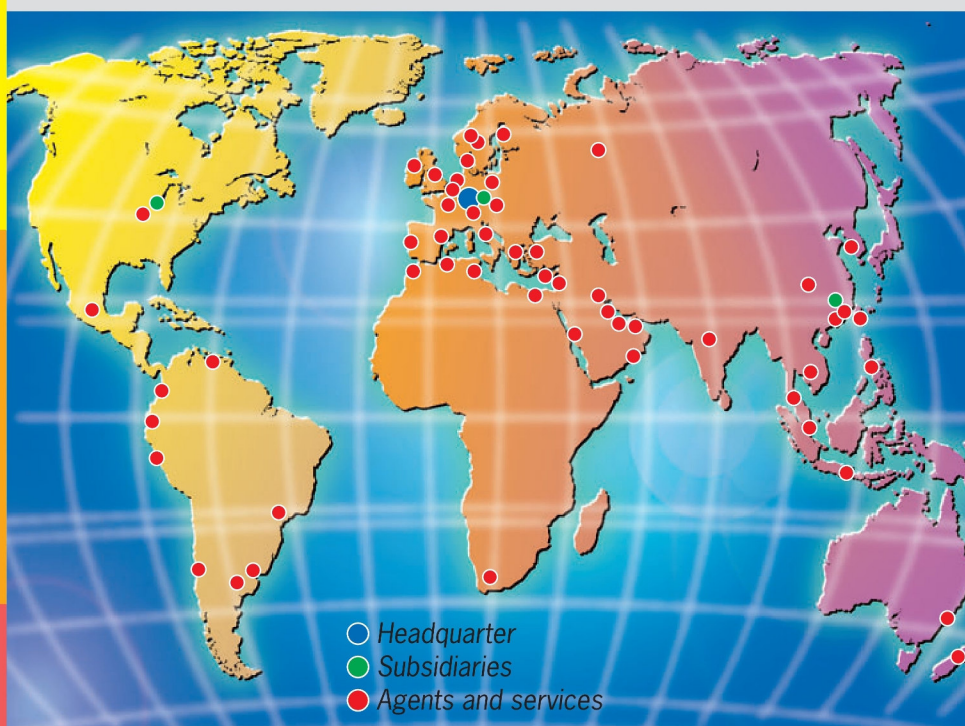

THE BASIS OF A SUCCESSFUL PARTNERSHIP

Whether you are talking rotary tools and units for inline solutions or whether you are trying to improve production figures using a combination of materials, we can advise you worldwide.

Use our engineering expertise. Schober is certified more than once to DIN EN ISO 9001 standard, so quality and finished products are second to none. Our worldwide expert customer service is available to solve any enquiries from spare parts to major technical applications.

Schober can lead you into a strong competitive position with their latest technologies.
